

## INSTRUCTIONS

### 1. ORDERS:

- A. Unless otherwise instructed by the Division of Purchases and Supply, all departments, institutions and agencies of the Commonwealth of Virginia will order items/services through eVA.
- B. If this contract is authorized for use by localities, Virginia cities, counties, towns and political subdivisions, orders will be placed through eVA to the maximum extent possible.

- 2. The applicable contract number, federal employer identification number (FEI), and item number (for itemized contracts) must be shown on each purchase order and copy, each facsimile transmission or given verbally when telephonic orders are placed.
- 3. Inspection on delivery and approval of vendor's invoice is the responsibility of receiving state agency, Virginia, city, county, town or political subdivision.
- 4. Any complaint as to quality, faulty or delinquent delivery, or violation of contract provisions by contractor shall be reported to the Division of Purchases and Supply for handling with the contractor. Preprinted forms (DGS-41-024), by which to facilitate the notification of the contractor and this office of complaints, are available from the Division of Purchases and Supply (786-8873).
- 5. Renewals. None remain. The decision as to whether to exercise the next renewal option will be made by the contract officer approximately four to six months in advance of the expiration date of the current term.
- 6. Price Adjustments. During the current term of the contract, price escalation may be allowed every 365 days, if justified. The contract officer makes the decision to allow or deny a request for increase based upon the documentation submitted by the contractor. The contractor is required to pass on any price reductions immediately. **IMPORTANT!** All price increases must be approved by the contract officer. Contract users will be sent a Notice of Contract Change from this office as official notification of such changes, if approved.

### 7. SPECIFICATIONS FOR MICROFORM SYSTEMS

- A. Work shall consist of providing all materials, labor, supervision, tools, equipment, and incidentals necessary to furnish, install, and render operational microfilm and /or microfiche (microform) systems for statewide location.
- B. All work requiring a Virginia Contractor's License will be preformed by the requesting Agency/location.
- C. The requesting Agency will provide a 120 VAC receptacle and any required breakers/disconnects required for these units.
- D. The Contractor shall plan and coordinate the performance of the work with the requesting Agency's representative to minimize disruption of other Agency personnel and to complete work in an orderly and expeditious manner. The Contractor shall notify the agency's representative at least five calendar days before beginning the work.

- E. The work shall performed by competent technicians that have been trained and certified by the manufacturer of the equipment offered are employees of the Contractor or the Contractor's sub and familiar with the specific equipment. They shall be supervised by full time foreman. Contractor shall be responsible for initiating, maintaining, and supervising all safety precautions and programs in connecting with the work.
- F. The Contractor shall perform the described work in accordance with the manufacturer's recommendations and these specifications. The Contractor shall provide all incidental items necessary to provide a complete operational microform system. All installation set-up debris shall be picked-up and lawfully disposed of off the requesting Agency's property at the conclusion of each work day.
- G. Any damage to existing utilities, equipment, or furnished surfaces, or furnishings resulting from this installation shall be repaired to the requesting Agency Representatives' satisfaction by the contractor at the contractor's sole expense.
- H. At the conclusion of the work, the Contractor shall demonstrate to the agency's representative that the work is fully operational and in compliance with these specifications and codes. Any deficiencies shall be promptly and permanently corrected by the Contractor at the Contractor's sole expense prior to final acceptance of work.
- I. GROUP 1: Low Volume, Small Screen, Digital Microfilm Reader/Scanner/Printer

1. Type: Desktop universal reader/scanner with laser printer
2. Film Format: 35mm or 16mm roll film, microfiche, aperture cards, both negative and positive silver halide or diazo film.
3. Film Feed: Motorized self-feed operation, with or without manual threading required.
4. Screen: Approximate size of 12" X 12" non-glare, non-grid.
5. Image Rotation: 360 degree, optical image rotation.
6. Lens: Zoom requirements with multiple or single zoon lenses to cover the range from 9.5 x to 50 x.
7. Print Size: 8-1/2" x 11" (horizontal or vertical), with automatic image rotation or manual.
8. Paper Supply: Plain paper (20 pound xerographic type bond cut sheet type).
9. Print Process: Dry coping process on plain paper.
10. First print speed approximately 20 seconds.
11. Polarity: Automatically prints positive copies from both negative and positive microfilm (also know as automatic bimodal operations).
12. Multiple copying: Able to print a minimum of 15 prints in succession.
13: Paper Feed: Automatic from paper cassette or tray.
14. Exposure Control: Automatic and manual.
15. Operational Environment: 50 degrees F to 90 degrees to 80% relative humidity (RH), non condensing.

16. Electrical Requirements: Must be able to operate from a standard 120 VAC receptacle.
17. Options Available: <ul style="list-style-type: none"> <li>a. 16mm ANSI cartridge (for use with image marks)</li> <li>b. universal carrier for 16/35mm open reel film, fiche, and aperture cards</li> <li>c. microfiche/aperture card carrier</li> <li>d. work-station for converting table top to floor model</li> <li>e. identify other option and any productivity features that may be available with the equipment like Auto-Skew Correction, Auto-Masking, and Auto (Zoom to Fit) Enlargement Printing</li> </ul>

J. GROUP 2: Mid-High Volume, Small Screen, Digital Microfilm Reader/Scanner/Printer

1. Type: Desktop universal reader/scanner with laser printer and a minimum scanning "Optical Resolution" range of 200 – 400 dpi.
2. Film Format: 35mm or 16mm roll film, microfiche, aperture cards, both negative and positive silver halide or diazo film.
3. Film Feed: Motorized self-feed operation, with or without manual threading required.
4. Screen: Approximate size of 12" X 12" non-glare, non-grid.
5. Image Rotation: 360 degree, optical image rotation.
6. Lens: Zoom requirements with multiple or single zoom lenses to cover the range from 9.5 x to 50 x.
7. Print Size: 8-1/2" x 11" (horizontal or vertical) and 11"x 17" with automatic image rotation or manual, two paper trays or cassettes.
8. Paper Supply: Plain paper (20 pound xerographic type bond cut sheet type). Paper supply should be minimum of 250 sheet capacity
9. Print Process: Dry coping process on plain paper.
10. Print speed: First print approximately 16 seconds.
11. Polarity: Automatically prints positive copies from both negative and positive microfilm (also know as automatic bimodal operations).
12. Multiple copying: Able to print a minimum of 15 prints in succession.
13. Paper Feed: Automatic from paper cassette or tray.
14. Exposure Control: Automatic and manual.
15. Operational Environment: 50 degrees F to 90 degrees and up to 80% relative humidity (RH), non condensing.
16. Electrical Requirements: Must be able to operate from a standard 120 VAC receptacle.

<p>17. Options Available:</p> <ul style="list-style-type: none"> <li>a. 16mm ANSI cartridge (for use with image marks)</li> <li>b. universal carrier for 16/35/mm open reel film, fiche, and aperture cards</li> <li>c. microfiche/aperture card carrier</li> <li>d. work-station for converting table top to floor model</li> <li>e. Identify other option and any productivity features that may be available with the equipment like Auto-Skew Correction, Auto-Masking, and Auto (Zoom to Fit) Enlargement Printing.</li> </ul>
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

K. GROUP 3: High Volume, Large-screen, Digital Microfilm Reader/printer:

1. Type: Desktop universal reader/scanner with laser printer, and a minimum scanning "Optical Resolution" range of 200 to 400 dpi.
2. Film Format: 35mm or 16mm roll film, and microfiche/aperture card, both negative and positive silver halide or diazo film,
3. Film Feed: Motorized self-feed operation, with or without manual threading required,
4. Screen: Approximate size of 11" X 17" non-glare,
5. Image Rotation: 360 degree, optical image rotation,
6. Lens: Zoom requirements with multiple or single zoon lenses to cover the range from 9.5 x to 50 x.
7. Print Size: 8-1/2" x 11" (horizontal or vertical) and 11"x 17" with automatic image rotation or manual, two paper cassettes or trays.
8. Paper Supply: Plain paper (20 pound xerographic type bond cut sheet type). Paper supply should be minimum 250 sheet capacity.
9. Print Process: Dry coping process on plain paper.
10. Print Speed: First print approximately 16 seconds.
11. Polarity: Automatically prints positive copies from both negative and positive microfilm (also know as automatic bimodal operations),
12. Multiple copying: Able to print a minimum of 15 prints in succession.
13. Paper Feed: Automatic from paper
14. Exposure Control: Automatic and manual
15. Operational Environment: 50 degrees F to 90 degrees, and up to 80% relative humidity (RH), non condensing.
16. Electrical Requirements: Must be able to operate from a standard 120 VAC receptacle,

17. Options Available:

- a. 16mm ANSI cartridge (for use with image marks)
- b. universal carrier for 16/35/mm  
open reel film, fiche, and aperture cards
- c. microfiche/aperture card carrier
- d. work-station for converting table top to floor model
- e. Identify other option and any productivity features that may be available with the equipment like Auto-Skew Correction, Auto-Masking, and Auto (Zoom to Fit) Enlargement Printing.

- L. MAINTENANCE MANUALS: The Contractor shall provide, with each system ordered, one complete set of operational, service, programming (if applicable), preventative maintenance, and maintenance manuals; including assembly and wiring diagrams, electrical and electronic schematics, component views, and parts listed on all products offered. These manuals shall include a copy of all warranties.
- M. TRAINING: The Contractor shall provide “hands on” equipment operation training at each installation set-up at the time required by local Agency’s representative.
- N. WARRANTY: The Contractor shall provide a warranty for the entire work against defective materials, workmanship, and performance, excluding vandalism, for one year from the date of acceptance of the installation. The Contractor hereby agrees to furnish without cost to the Commonwealth, all labor, material, and transportation both ways for replacement of all parts and materials that are found defective during the warranty and maintenance periods. Warranty response (call back to repair for warranty service) shall be made within 4 hours during Agency working hours. Warranty repairs shall be made within 24 hours on Agency working days after response call backs. Repair parts shall be readily available for at least 7 years following date of acceptance.
