

AMMUNITION CONTRACTS

General Information and Lead Time Recommendation

Contract Organization:

Effective January 1, 2011 there are three contracts as shown below. The Vendors and the manufacturers are the same as what has been available to you previously. In the past all three were contained on one contract; now each is on a separate contract as shown.

When ordering in eVa please reference the following contract numbers:

Contract E194-1190-VP

Vendor/Dealer: The Gun Shop
Manufacturers: CCI/Speer, Federal, and Fiocchi

Contract E194-1191-VP

Vendor/Dealer: Town Police Supply
Manufacturer: Remington

Contract E194-1192-VP

Vendor/Dealer: Arrington's by Streicher's
Manufacturer: Winchester

Lead Times:

Because of the increased demand by the federal government (Military, Homeland Security, FBI, etc.) over the past several years, delivery lead times for many types of ammunition have consistently exceeded one year. This situation may not improve for an extended period, perhaps a year or two.

Therefore, it is extremely important that you plan your consumption and ordering schedules with the above in mind. **I recommend that you place orders assuming a one year lead time as being "normal", and then order again when that shipment arrives.** Of course, you may vary your frequency of orders in accordance with any order specific advice you get from our vendors, or as you determine is best for your agency.
