GEO-MATTRESS®

Therapeutic Foam Mattress

We Started With Our Clinically Proven Geo-Matt® Design ...

The new Geo-Mattress® lineup incorporates the patented* Geo-Matt design trusted in healthcare facilities across the U.S. for over a decade. Configured with over 800 individually-responsive cells in distinct head, torso, and foot zones. Its unique, anti-shearing geometry ensures customized support and therapeutic pressure management for every user.

**Geo-Matt® products are covered by one or more of the following United States Patents: 4,862,538; 5,025,519; 5,252,278; and 5,580,504.

GEO-MATTRESS® Max

Maximum Patient Protection

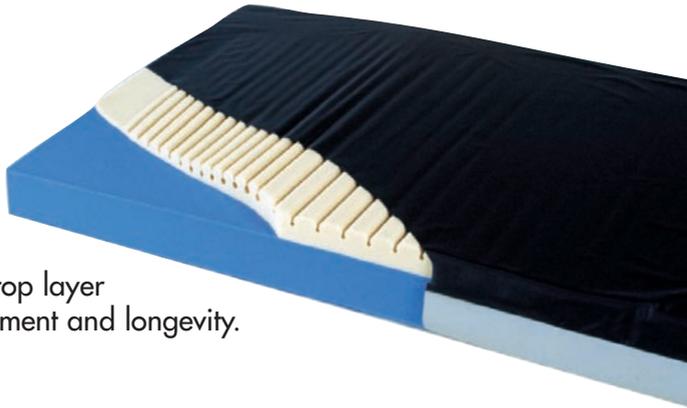

Three-tier, zoned design makes it our finest Geo-Mattress offering. Luxurious viscoelastic "memory foam" foot section cradles and protects the heel. Firm perimeter bolsters for added safety.

GEO-MATTRESS® Plus

Performance...Plus!

Dual-layer, progressive-resistance design perfectly blends patient comfort and clinical effectiveness.

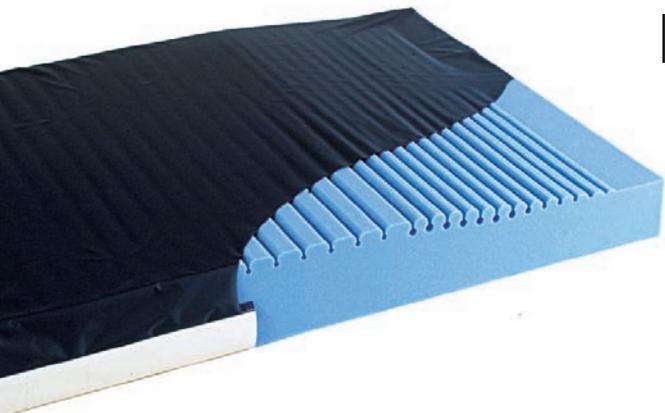

Differentiated high-density Geo-Matt top layer ensures outstanding pressure management and longevity.

GEO-MATTRESS® Pro

Affordability without Compromise

Single layer, zoned construction delivers excellent value for budget-conscious facilities.

Any Surface. Any Seat. Any Site. Any Setting.

SPANAmerica
Innovative Solutions.

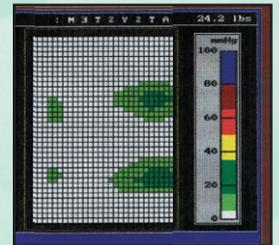

Then Went Two Feet Forward!

Introducing Heel Slope™

Exclusive design feature ensures a remarkably low peak pressure at heels -- 27% lower than the leading competitor.**

Subtle taper effectively distributes load along the more pressure-tolerant lower legs and calves. Significantly reduces peak interface pressures at heels while providing all the foot support of traditional mattresses.

ERGOCHECK® computerized pressure mapping shows extremely low heel pressures produced by Heel Slope.

Heel Slope delivers the lowest interface pressure of any product in its class. Clearly outperforms even the more expensive, optional heel features offered by others (pillows, inserts, adjustable components, etc.). Yet Heel Slope is standard on every Geo-Mattress Max, Plus, and Pro model, and requires no adjustment!

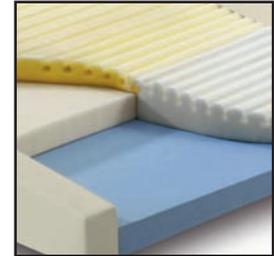

**Independent verification available upon request.

PRESSUREGUARD CFT®

Non-Powered Dynamic Air/Foam Mattress System

Now!
GROUP II
REIMBURSABLE
Non-Powered Treatment
(MEDICARE CODE EO373)

Constant Force Technology at Work

With user supine, dual, elasticized reservoirs react independently in concert with surface, keeping pressures evenly distributed throughout mattress.

Result: Greater immersion into system increases surface area, lowering pressures to levels previously achievable only with powered systems.

When user shifts to side-lying, air flows from areas of high pressure concentration (pelvis, shoulder) into corresponding reservoir.

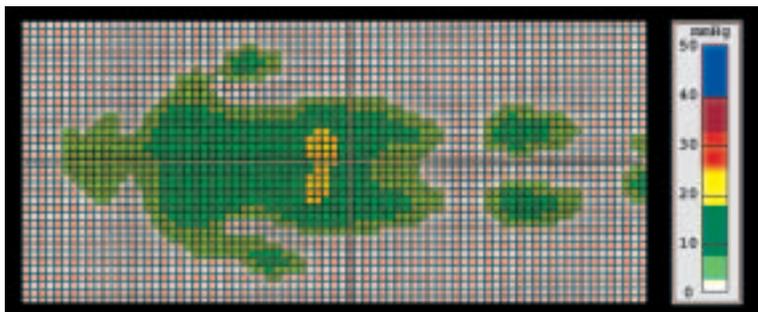

Result: Reservoir absorbs this displaced air to accommodate load and re-equalize pressures without surface bottoming out.

Powerful results – without power!

Sound impossible? With a standard static air system, it is.

But the all-new PressureGuard CFT is truly different. It uses patented* Constant Force Technology™ to automatically adjust its network of interconnected air cylinders and elasticized reservoirs to the appropriate, therapeutic levels for each patient, regardless of their weight or position (see right). Delivers customized pressure reduction comparable to low air loss and other powered systems. A clinically-effective solution for ulcer prevention and treatment, and the cost-effective alternative when resources limit care options.

ERGOCHECK® computerized pressure mapping confirms outstanding pressure distribution and low average of peak pressures.

PEAK INTERFACE PRESSURES (in mmHg)

SUBJECT: Male, 5'10", 180 lbs.

* US Patent #'s 5,649,331, and 5,652,985, with other patents pending.

CFT SPECIFICATIONS

Firmer perimeter bolsters gently prompt patient toward center of bed without awkward buildups that obstruct entry and egress. Facilitates safer transfers and stable edge-of-bed sitting.

Shaped, slotted inner bolsters and topper's underside arches work in concert to cradle and surround air cylinders. Interlocking, integrated design provides flexible, progressive support and maximizes structural integrity.

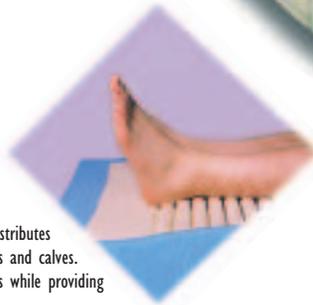

Clinically-proven Geo-Matt® design* creates a unique, anti-shearing top surface. 800 individually-responsive cells in distinct head, torso, and foot zones enhance therapeutic support and comfort. *U.S. Patent No. 4,862,538

Every air system is thoroughly inspected and tested prior to shipment to ensure proper inflation level and maximize performance in the field.

Integrated side flap with Velcro® closure flap allows easy access to quick-connect ports for simple re-inflation or adjustment of air system via hand pump.

Exclusive Heel Slope™ feature redistributes load to pressure-tolerant lower legs and calves. Subtle taper reduces heel pressures while providing complete foot support.

Standard vapor barrier cover fabric has ultra-low moisture vapor transmission (MVT) rate. Fluid-proof coated nylon fabric is easily cleaned, bacteriostatically treated, anti-fungal, anti-static and meets Cal 117 and NFPA 701 flammability requirements. Optional stretch fabric cover also available.

COVER CLEANING

Wipe clean with neutral suds. Approved cleaning agents include germicidal phenols and quaternary ammonia. Avoid the use of bleach.

FOAM

Premium, combustion-modified foam conforms to NFPA 101 small scale and Cal 117. FireGuard versions also available to conform to 1997 NFPA 101 (Life Safety Code) and Cal 129.

WARRANTY

Guaranteed against defects in materials or construction for 5 years. Consult full product warranty for details.
